

PUSHPRAJ SHELAR

Data Analyst | Business Intelligence Analyst | Power BI Developer | SQL Developer | Python | Tableau | Advanced Excel | Data Visualization | Business Intelligence | Reporting Automation
+91-9975331379 | pushprajshelar.da@gmail.com | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Data Analyst with **4+ years of experience** in **Data Analytics, Business Intelligence, Data Visualization, Dashboard Development, Reporting Automation, Business Reporting, Data Modeling, SQL Development, ETL Processes, and Business Performance Analysis**. Expertise in developing interactive dashboards using **Power BI, Tableau, SQL, Python, Advanced Excel, Power Query, and DAX** to transform complex business data into meaningful insights. Strong experience in **SQL Query Optimization, Data Cleaning, Data Transformation, Data Validation, Statistical Analysis, Forecasting, Predictive Analytics, KPI Reporting, Executive Dashboards, and Reporting Automation**. Skilled in building scalable Business Intelligence solutions, designing ETL workflows, optimizing database performance, and delivering data-driven insights that improve operational efficiency and strategic decision-making.

TECHNICAL SKILLS

Business Intelligence & Data Visualization: Power BI, Tableau, Power BI Service, Power Query, DAX, KPI Dashboards, Executive Dashboards, Interactive Dashboards, Business Intelligence Reporting, MIS Reporting, Dashboard Development, Data Visualization, Data Storytelling

Programming & Data Analytics: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Descriptive Statistics, Inferential Statistics, Hypothesis Testing, Regression Analysis, Time Series Analysis, Data Analysis, Data Cleaning, Data Transformation, Data Manipulation, Statistical Analysis, Predictive Analytics

Database Technologies: SQL Server, MySQL, Database Management, Data Warehousing, SQL Query Optimization, Stored Procedures, Views, Joins, CTEs, Window Functions, JSON

ETL & Data Engineering: ETL Pipelines, Data Extraction, Data Integration, Data Migration, Data Validation, Data Processing, Data Quality Management, REST APIs, API Integration, Python Automation, Workflow Automation, Spark (PySpark)

Reporting & Business Analytics: Business Analytics, Trend Analysis, Forecasting, Root Cause Analysis (RCA), Business Performance Analysis, Executive Reporting, KPI Monitoring, Data Interpretation, Report Automation

Microsoft Excel: Advanced Excel, Pivot Tables, Pivot Charts, VLOOKUP, XLOOKUP, Conditional Formatting, Data Validation, Power Query

Cloud & Analytics Platforms: AWS (S3, EC2), Microsoft Azure (Azure Fundamentals, Azure Data Factory, Azure Blob Storage, Azure Data Lake Storage), Databricks, Snowflake, Google Cloud Platform (Basics)

Development Tools: Jupyter Notebook, Git, GitHub, CI/CD Basics

Methodologies: Agile Scrum, SDLC, Requirement Gathering, Business Analysis, Data Modeling, Reporting Automation, Data Governance

PROFESSIONAL EXPERIENCE

Codereach Software Pvt. Ltd. | Data Analyst

April 2022 – Present

Roles & Responsibilities:

- Developed interactive Power BI and Tableau dashboards for KPI monitoring, executive reporting, sales analytics, and business performance, enabling data-driven decision-making.
- Analyzed large datasets using SQL, Python, Advanced Excel, Power Query, and DAX, performing data cleaning, transformation, validation, statistical analysis, and visualization to deliver actionable business insights.
- Designed and optimized SQL queries, stored procedures, joins, CTEs, window functions, and data models, improving dashboard performance, reporting efficiency, and data retrieval speed.
- Automated MIS reporting, ETL workflows, and reporting processes, reducing manual effort by 40% while ensuring high data quality, accuracy, and consistency.
- Collaborated with cross-functional stakeholders in an Agile Scrum environment to gather business requirements and deliver scalable Business Intelligence, analytics, forecasting, and reporting solutions.
- Performed Exploratory Data Analysis (EDA), trend analysis, and Root Cause Analysis (RCA) to identify business opportunities, monitor KPIs, and support strategic decision-making.
- Developed and maintained automated data extraction, integration, and validation workflows using Python, REST APIs, and ETL processes, improving reporting reliability and reducing manual intervention.

- Supported cloud-based analytics initiatives by working with Microsoft Azure Fundamentals, Azure Data Factory, Snowflake, and Databricks in learning and implementation activities while following Git, GitHub, and CI/CD best practices for version control and deployment support.

PROJECTS

Project 1: Healthcare Analytics & Patient Management Dashboard

Description: Developed an enterprise Healthcare Analytics and Patient Management Dashboard to analyze patient admissions, discharge rates, hospital occupancy, treatment outcomes, appointment scheduling, physician performance, billing, insurance claims, and operational KPIs. The solution provided real-time business intelligence through interactive dashboards, enabling hospital management to improve patient care, optimize resource utilization, reduce operational costs, and support data-driven decision-making.

Roles & Responsibilities

- Developed interactive **Power BI** dashboards to monitor patient admissions, discharge trends, hospital occupancy, treatment outcomes, and executive healthcare KPIs.
- Created dynamic reports using **Power BI, SQL, DAX, Power Query, and Advanced Excel** for healthcare operations, patient analytics, and performance reporting.
- Analyzed large healthcare datasets using **SQL, Python (Pandas, NumPy, Matplotlib)** to identify trends, improve patient care, and support business decisions.
- Designed optimized **SQL queries, Stored Procedures, Views, Joins, CTEs, and Window Functions** to improve reporting performance and data retrieval efficiency.
- Performed **data extraction, cleansing, transformation, validation, and ETL processes** to ensure high-quality and accurate healthcare reporting.
- Developed KPI dashboards for **patient satisfaction, physician performance, appointment utilization, revenue analysis, insurance claims, and operational efficiency**.

Project 2: Enterprise Business Intelligence & Sales Analytics Platform

Description: Developed a centralized Business Intelligence platform for analyzing sales performance, revenue trends, customer insights, executive KPIs, and business metrics across multiple business units using Power BI, SQL, and Python.

Roles & Responsibilities

- Developed dynamic Power BI dashboards with **drill-through, drill-down, and KPI visualization**.
- Automated reporting workflows using **SQL and Python**.
- Optimized SQL queries and reduced dashboard loading time by **approximately 35%**.
- Designed executive dashboards for **revenue analysis, sales trends, and performance monitoring**.
- Improved reporting efficiency through **automated ETL processes and data integration**.
- Developed **reusable reporting components and business intelligence dashboards**.

Project 3: Real-Time Pricing Index for Multi-Platform E-commerce

Description: Built a real-time pricing index system to monitor and compare product prices across multiple e-commerce platforms. The system provided continuous updates on pricing movements and competitive trends. Data-driven insights supported strategic pricing and market positioning decisions.

Roles & Responsibilities

- **Automated** real-time **price data extraction** from multiple **e-commerce platforms**.
- **Processed** and **normalized pricing data** using **Pandas** and **NumPy**.
- Created **dashboards** to track **pricing trends, fluctuations, and anomalies**.
- Delivered **analytical reports** to support **competitive pricing strategies**.
- Performed **Exploratory Data Analysis (EDA)** and **trend analysis** to identify pricing patterns, seasonal fluctuations, and competitor pricing strategies, enabling data-driven business decisions.
- Designed and optimized **ETL workflows** for data validation, transformation, and quality management, ensuring accurate, consistent, and analysis-ready pricing datasets for reporting.

Professional Background

Prior to transitioning into Data Analytics, built a strong foundation as a Production Executive in the pharmaceutical industry, contributing to production operations, quality compliance, process documentation, cross-functional collaboration, team coordination, operational planning, and continuous process improvement. This experience strengthened my analytical thinking, ownership, stakeholder collaboration, decision-making, ability to perform under pressure, and commitment to operational excellence.

EDUCATION

Master of Science (M.Sc.)

Madurai Kamaraj University
